

GRAYSCALETRADING.CO

GrayTrading Bot

INTRODUCE

The high volatility of the cryptocurrency market makes it difficult to predict the right time to invest. Grayscaletrading.co is an automated trading bot that helps find a way around this problem.

Launched in 2018 by a team composed of many experienced members in the cryptocurrency market, it includes some of the most advanced features to create your trading strategy that people can use without Previous programming experience. The platform will provide you with simple and powerful tools that enhance your creativity. A very flexible editor, infinite possibilities!

By registering some basic conditions, connect them and create basic or advanced automated strategies. All of this can be generated without any lines of code!

Grayscaletrading.co offers various blocks that can be linked; such as logic operators, market indicators, value activation, technical analysis, information and message blocks are improved. As the platform develops, new functions will be added, such as risk analysis tools and new blocks, some of which are based on Artificial Intelligence such as sentiment analysis and coin prediction. Deep Learning's direction.

You can test your strategy across the entire cryptocurrency history on Binance Exchange or BitMex Exchange

The market connects the creators and users of the platform. Simply choose the right strategy for you based on the pair you want to trade and let it do the job for you!
